Bringing kitchenware market intelligence to the table!

Editorial coverage in Kitchenware News focuses on the kitchenware retailers who service this \$10 billion market and on the market trends that are driving their success. Kitchenware News reaches more than 11,000 kitchenware retailers each month with information, insights and tools that they depend on when they make the merchandising decisions for their stores. Our experienced news reporters dig for the facts behind the day-to-day retail landscape to explore how the world of kitchenware retailing is evolving to serve the well-educated and affluent home cooks who seek out specialty retailers to provide them with advice as well as the kitchenware and gourmet food products they need to nourish themselves, their families and their guests in their kitchens and dining rooms.

Many Baby Boomers are currently downsizing their living quarters while they adjust their eating habits with a view to longevity. Millennial-generation adults are setting up households buying houses and starting their families. Both of these age groups, together worth almost \$5 trillion in annual spending power, are buying with an eye for quality, durability and effectiveness to meet their goals of enjoyable cooking experiences, better nutrition, food safety and economy. It's time to be sure that your message is reaching your retailers in the publication that takes the time every month and has the expertise to explore these trends and give specialty kitchenware retailers the tools to communicate effectively with their customers.
